

Volton CRM — Employee Guide

For: **Call agents**, **Field agents** and **staff with a custom role** (e.g. Installer, Store). Website: <https://volton-crm.vercel.app>

The golden rule: every call and WhatsApp must start **from the CRM buttons**, and you must **save what happened** with a screenshot. That is your proof of work.

1. First day — checklist (everyone)

- ☐ Sign in with the username and temporary password from your manager, then set your own password.
- ☐ Install the app: Android Chrome → **Install app**; iPhone Safari → Share → **Add to Home Screen**.
- ☐ Tap the bell 🔔 → **Turn on phone / PC notifications**. New leads, pings and reminders come to your phone even when the CRM is closed.
- ☐ Find your section below: call agent (2), field agent (3), or staff / custom role (4).

2. Call agents

2.1 Start of the day

- ☐ Open **Dashboard** → **Check in**. You get **no leads** until you check in.
- ☐ Going for lunch / prayer: **Start break** (new leads pause). Back: **End break**.
- ☐ End of day: **Check out** → **Yes, check out**. If you forget, the CRM checks you out 30 minutes after office closes.

2.2 When a new lead comes

1. Your phone shows **"New lead for you — accept now"**.
2. Dashboard → **Accept VL-xxxxx** (or open the lead → **Accept this lead**).
3. Accept within **5 minutes**. If you don't, your manager is told and the lead may go to the next agent.
4. The customer's number is hidden until you accept.

2.3 Contacting the customer (one "try")

1. On the lead page tap **WhatsApp**, **WA call** or **Call**. The CRM records the time and opens WhatsApp / the dialer.
2. Talk to the customer.
3. Come back to the CRM. A box asks **"What happened?"**:
 - **Step 1 — Did you reach the customer?** Connected · No Answer · Busy · Number Off · Wrong Number · Couldn't call now
 - **Step 2 (if connected) — What did the customer say?** Interested · Not Interested · Call Back Requested · Already has solar · Deal done (enter sale value)
 - Note, next follow-up time (optional)
 - **Add a screenshot** of the call log or chat — best proof

4. Press **Save result**.

Tapped by mistake? Use "**I tapped by mistake — no call or chat happened**" (within 2 minutes). It is not counted as a try. You cannot start a new try on a lead until the last one is saved.

2.4 The 3-try rule

- Try 1 → Try 2 (next day) → Try 3 (3 days later). The CRM reminds you: "**Follow-up due**".
- **3 no-answers** (No Answer / Busy / Number Off) over at least 2 days → the lead becomes **Dead** automatically.
- **Wrong Number** → Junk.
- Missing a follow-up by 4 hours → **OVERDUE** alert goes to you **and your manager**.

2.5 Moving the lead forward

You do	Lead moves to
Connected call	Contacted
Customer said Interested	Interested
Save Site & visit → Site details (bill, units, roof, kW)	Requirement Collected
Book site visit	Site Survey (a field agent is chosen automatically)
Quotation → Generate quotation PDF with "Move to Quotation sent" ticked	Quotation Sent

You can also set Contacted / Interested / Requirement Collected yourself in **Stage**.

2.6 Making a quotation

1. Lead page → **Quotation** card.
2. Choose **PDF design: Volton classic** (our usual PDF) or **Modern**.
3. Fill panels, inverter, battery, structure, wiring, net metering, labour, extras, discount, warranty. The total updates live.
4. **Generate quotation PDF** → then **Send to customer on WhatsApp, Download, or Share from phone**. (Sending from the CRM works only if the customer messaged in the last 24 hours — otherwise use **Open customer's WhatsApp**.)

2.7 Closing a lead

- **Deal done** → enter the sale value. **Not interested / Dead / Wrong number** → write what the customer said (required).
- Tick **Close this lead (your manager will check it)**.
- Your manager checks every close. If they **Dispute**, the lead re-opens and you are told.

2.8 Things that get flagged (avoid them)

Never left the app · Too fast · Screenshot reused · Screenshot time mismatch · Logged while not checked in · Call length much longer than the time away. Some clean calls are randomly **spot-checked** — your manager may call the customer.

2.9 Daily checklist — call agent

- ☐ Checked in?
- ☐ All new leads accepted within 5 minutes?
- ☐ Every new lead contacted within 15 minutes?
- ☐ Every try saved with a result and a screenshot?
- ☐ **Follow-ups** page: nothing overdue?
- ☐ Interested customers: site details saved / visit booked / quotation sent?
- ☐ Checked out at the end of the day?

3. Field agents (site visits)

- ☐ **Check in** when you start field work — checked-in field agents get new visits first.
- ☐ Your phone shows "**Site visit: <customer> (<kW>)**". Open **Site visits**.
- ☐ Go to the site, then press **Update visit** and choose: **Visited** · **Interested** · **Not interested** · **Rescheduled**.
- ☐ Write **What happened?** (required). For Rescheduled, set the new time.
- ☐ **Interested** moves the lead to Quotation Pending. **Not interested** sends the visit to another field agent and tells the manager.
- ☐ **Check out** at the end of the day.

Visits are shared by kW: the field agent with the least work gets the next visit.

4. Staff / custom roles (no leads) — working with Instructions

If your role does not get leads, your work comes as **Instructions**.

1. Your phone shows "**New instruction from <name>: <task>**".
2. Open **Instructions** → **For me**.
3. Update the status as you work, with a short **Note** if useful:

Now	You can change it to
To do	In progress · On hold
In progress	Send for review (when done) · On hold
In review	In progress (if you need to fix something)
On hold	In progress

1. When you finish, press **Send for review**. The person who gave the task checks it and marks it **Completed**. You cannot mark Completed yourself.
2. Items past their due date show **(late)** in red — do them first.

You can also give an instruction to a colleague: + **New instruction**.

Daily checklist — staff

- ☐ Open **Instructions** → **For me** in the morning.

- ☐ Start the urgent / late ones first; set them **In progress**.
- ☐ Send finished work **for review** with a note.

5. The website (voltonsolar.com)

- **Quotations:** the Solar panels, Inverter and Battery boxes have **Pick from website products** — the same products and prices as on voltonsolar.com. Pick one, then change the price if your manager agreed a different one.
- **Same login:** if you have website access, sign in at **voltonsolar.com/admin/login** with your **CRM username and password**, or tap **Website admin** in the CRM menu.
- **What you can do there** depends on the access your manager gave you:
 - **Website editor** (call agents, marketing): update products, prices, plans, deals, testimonials, videos and other content.
 - **Website admin** (managers): everything, including website settings.
 - **No website access:** the **Website admin** button does not appear for you.
- Anything you change on the website is live for customers straight away — double-check prices before saving.

6. Quick answers

Question	Answer
I get no leads	Check in. Not on break? Ask your manager to check Gets leads automatically and the lead order.
Customer number shows as ●●●●	Accept the lead first.
I checked out by mistake	Tap Check in again.
My manager pinged me	The message shows as a notification; it is also on the lead's timeline.
WhatsApp send from CRM fails	The customer has not messaged in 24 hours — use the WhatsApp button to chat from your phone.
